

What I should already know		Working scientifically skills	Key Vocabulary	
1	Observed changes across the four seasons.	Gather, record, classify and present data in a variety of ways to help in answering questions. Record findings using simple scientific language , drawings, labelled diagrams, keys, bar graphs and tables. Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions. Look for patterns in what happens to shadows when the light source moves or the distance between the light source and the object changes.	Light	A form of energy that travels in a straight line from a source.
2	Observed and described weather associated with the seasons and how day length varies		Light source	The place where light is coming from.
3	Looked closely at similarities, differences, patterns and change.		Dark	Dark is the absence of light.
4	Have some knowledge of where light comes from.		Surface	The outside part or topmost layer of something.
By the end of the unit, I will know:		Scientists/inventors	Shadow	Darkness caused by light being blocked.
1	That light is needed to see things and that dark is the absence of light		Opaque	Does not allow light to pass through
2	That light is reflected from surfaces		Reflect	To change the direction of light using a shiny surface.
3	That light from the sun can be dangerous and that there are ways to protect their eyes.		Mirror	A surface which reflects a clear image.
4	That shadows are formed when the light from a light source is blocked by a solid object.		Sun	The star around which the Earth orbits.
5	Find patterns in the way that the sizes of shadows change.		Sunlight	The light received from the Sun.

Percy Shaw (1890 – 1976)
An English inventor and businessman who invented the 'cat's eye.'
