

### What I already know:

### Key Vocabulary

germination	When a seed begins to grow, it shoots. Seeds need warmth and water to germinate.
shoot	A shoot grows upwards from the seed or plant to find sunlight.
sunlight	All plants need light from the sun to grow well.
water	All plants need water to grow. Without water, seeds and bulbs will not germinate
temperature	Temperature is how warm or cold something or somewhere is.
nutrition	Food or nourishment. Plants make their own food in their leaves using sunlight.

### What I will learn:

What does a plant need to grow and stay healthy?

Some plants grow quickly and some grow more slowly.

### Working Scientifically Skills:

Observe closely and measure the growth of a plant.
