

I should already know

Images can be saved onto the camera roll in tablet devices

The internet can be used to research information about a variety of subjects

Presentations need a mixture of information and pictures to engage an audience

Questions I will be able to answer by the end of the unit:

How do I find relevant information online?

How do I find images that I can use in presentations?

How does a green screen work?

How do I record something using a camera?

Key Vocabulary

Camera Roll

The area on a tablet device or smartphone where all the images are stored once captured or saved

Creative Commons

A copyright license that allows for content such as images and music to be reused without permission, for certain purposes

Green Screen

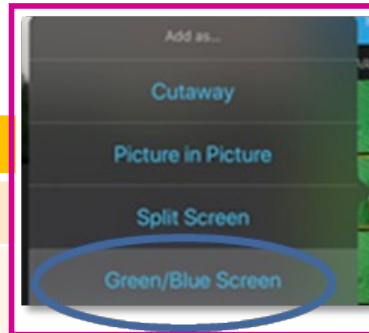

A special video technique where the green pixels in the background of video footage can be replaced with pixels from a different image or video

Pixel

The smallest element of an image; a small, square dot that, along with many other pixels, makes up a digital image

Rushes

Footage from a video recording that has not been edited

By the end of the unit, I will:

Research information about a focus topic

Find appropriate pictures to incorporate into a presentation that do not violate **copyright laws**

Record and **present** information on the chosen topic

Gain skills in **presenting**
