

## I should already know:

Know what sustainability is and how developments can be sustainable

Some of the changes that have happened in the local area in the last 100 years

That people have differing views about change in their local area

What community spirit is, and why it is important

## By the end of this unit I will:

understand and describe the physical and human geography in our local area.

use fieldwork to observe, measure, record and present features in the local area

explain how facilities currently meet the needs of the local area

have an understanding of what could be done to meet changing community needs

explain the need for sustainable developments

## Vocabulary

1	<b>Topography</b>	the study of shape and features on the surface of the Earth
2	<b>Preservation</b>	protecting the environment from harmful human activities.
3	<b>Development</b>	any improvement in the standard of living through building and infrastructure
4	<b>Industry</b>	a group of businesses that make or sell similar products or perform similar services.
5	<b>Amenities</b>	something that helps to provide comfort, convenience, or enjoyment.
6	<b>Sustainable</b>	using natural resources responsibly to support both present and future generations.

## Types of housing

Sustainable developments	Terrace	Bungalow	High-rise flats	Georgian	Semi-detached
