

**What I already know:**

- 1 How to turn on and log into a Macbook
- 2 How to open an app on an iPad

**By the end of the unit, I will:**

Use GarageBand and ScratchJr to create our own music

Learn to use an iPad to record our voices and fun sounds

Make sprites play back the sounds we record

Learn how to make exciting beats and rhythms that repeat

Explore and play lots of instruments on GarageBand

**Knowledge check:  
Percussion patterns**

We can use GarageBand to create a repeating percussion pattern

Each coloured row is in charge of a different percussion instrument

When you click on one of the boxes in the row it lights up, meaning it is on for that beat of the song

**Key Vocabulary**

1	dataset	A set of data from a group related to a particular topic
2	field	Information in a database that relates to a single type of information, such as age
3	record	Information in a database that relates to one individual or case, e.g. a library database should have a record for each book
4	sprite	A graphical character in a program that can be given instructions
5	track	A special path where we put sounds and instruments to make songs
